# A Guide to Thermoplastic Playground Markings

## **How does this work? Do we pick from the catalogue? Do you do site surveys? Help!**

Good news. Yes we do site surveys.

More good news! We are only a phone call away and are happy to help. Feel free to call to discuss your requirements and ask any questions you have. 01275 463601

Some customers prefer a site visit from us to ensure the markings will fit and to ensure they haven't missed anything. Some don't. It's entirely personal preference but it's good to know we can complete a site survey if you prefer.

Prior to our arrival it is a good idea to have a look through the catalogue, perhaps get some input from the teachers and children who will be using these markings. We can then meet and discuss your ideas whilst adding our own expertise if needed.

## **A summary of the process would be...**

First we need to establish your requirements either by phone / email or by meeting you on site.

We will then send a proof & quotation so you can see exactly what the markings will look like.

You give the go-ahead and we start manufacture of your order.

As we get close to completing manufacture we will contact you to arrange a convenient date to install. We install.

## **Thermoplastic or painted markings? Whats the difference?**

Painted markings are much cheaper than thermoplastic but lack the long term durability.

From our experience, painted markings last 6-12 months whereas thermoplastic markings last up to ten times as long.

## **Guarantees.**

3 year no quibble guarantee on all our markings and work.

## **DBS/CRB Checks.**

All our installation teams are fully CRB / DBS checked on a regular basis. They also carry photo ID & copies of their DBS / CRB checks with them at all times. We take our responsibilities seriously.

## **Taking of safety.... IOSH Qualified? Risk assessments?**

Each team has at least one person who has passed the Institute of Safety & Health's training course thereby qualifying them to correctly and competently carry out Risk Assessments.

We have public and product liabilities insurance for £5,000,000 (copy available on request)

## **Can you install during term time?**

Absolutely! The vast majority of our work is carried out during term time.

Ideally we need exclusive use of the playground, however we can set up a safety perimeter using cones and warning tape. We can even set up walkways to ensure that you have access to the areas you need.

All this will be discussed prior to our arrival so that an access plan is established prior to our arrival.

## **Are the markings slippery in the wet?**

Not at all. The thermoplastic has anti-slip beading within it. We add even more during the installation process to ensure that it remains anti-slip even as the marking wears out.

## **What facilities do the installation team need?**

We simply need access to the playground and a toilet. That's it.

## **Our tarmac playground surface isn't great.... does that matter?**

The short answer would be, 'in 99% of cases. No.'

The longer and more informative answer would be as follows, the tar content within a playground's surface becomes less and less over time. A brand new playground surface will adhere to thermoplastic markings very well. A playground that's 10 years old, much less so.

To counteract the lack of 'stick' within an aged surface we use a primer specifically designed for thermoplastic markings. Thermoplastic will still last a number of years on an unprimed surface, but we pride ourselves on getting the job done correctly and thus add the primer for an even longer life.

Removing / covering markings is an added expense which can be put off by using primer at installation time.
